Sequence 4, Application US/10899711

Sequence 4, Application No. US20050031638A1

GENERAL INFORMATION:

APPLICANT: Dalemans, Wilfried L.J.

APPLICANT: Gerard, Catherine Marie Ghislaine

TITLE OF INVENTION: Compositions Comprising Human Papilloma Virus Proteins

TITLE OF INVENTION: Compositions Comprising Human Papilloma Virus Proteins

TITLE OF INVENTION: And Fusion Proteins Adjuvanted with a CpG Oligonucleotide

CURRENT APPLICATION NUMBER: US/09/581,976

PRIOR FILING DATE: 2000-6-20

PRIOR FILING DATE: 1998-12-18

No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                Sequence S

Sequence 6, Application US/1017390

Sequence 6, Application US/1017390

Publication No. US20030143743A1

GENERAL INFORMATION:

APPLICANT: Schuler, Gerold

APPLICANT: N.V. Antwerps Innovatiecentrum

TITLE OF INVENTION: Improved Transfection of Eucaryotic Cells with Linear

TITLE OF INVENTION: Polynuclectides by Electroporation

FILE REFRENCE: 021505wo/JH/ml

CURRENT APPLICATION NUMBER: US/10/177,390

CURRENT FILING DATE: 2002-06-20

NUMBER OF SEQ ID NOS: 34

SOFTWARE: Patentin Ver. 2.1
